

TV Digital Amplifiers

A range of high gain, digital, wide band amplifiers designed with low noise capabilities and variable gain adjustment. Ensures optimum performance and improved reception for all non-amplified antennas.

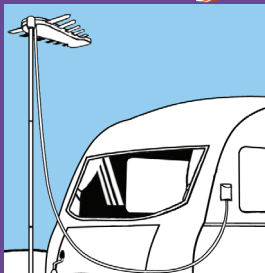

To operate:

- Determine the polarization of the local TV transmitters.
- Switch on the amplifier
- Rotate your antenna
- **RED** - Keep turning the antenna
- **YELLOW** - Slow Down
- **GREEN** - TV Signals located

Jockey Wheel Mast

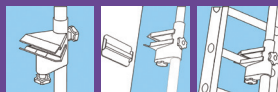

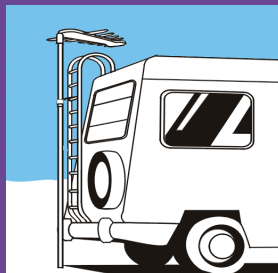

Designed to attach to the caravan jockey wheel or any vertical extrusion up to 55mm in diameter. Complete with 2.6m three section mast & ground spike.

- Secured without the need for drilling
- Two sets of holes accommodate larger A-frames
- Quick and easy assembly when required

Uni-Mast

This versatile bracket clamps to a multitude of profiles or any vertical surface using the self-adhesive plate supplied. Complete with 2.6m three section mast & ground spike.

- Ideal for numerous horizontal profiles.
- Ladders, grab handles or awning channels
- Clamp Adjusts from 1-35mm

Telescopic Mast

This four-section mast comes with a ground spike and is ideal for use with all the Vision Plus mast brackets below.

- Four section mast extends to 3.5metres
- Only 1.1m when retracted
- Ground spike for soft standing

Mast Brackets

All our brackets come as part of a complete mast system, or can be used separately with any 25mm diameter mast.

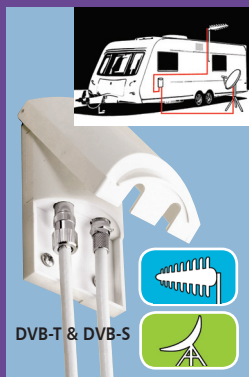

Jockey Wheel Bracket

Uni-Bracket

External TV Sockets

Allows the connection of an external antenna and/or satellite to an internal TV point. All connections are protected from the weather by a hinged cover. Complete with 5 metres of coaxial cable.

Electronic Radio Antenna

Our 8-section telescopic radio antenna is designed for use with a car style radio to receive AM and FM transmissions. The power supply comes from the radio unit.
